8th July 1986

MUSIC 5000 SYNTHESIZER

Announcing the most important event in BBC Micro Music since the appearance of the Music 500 in 1984 - the launch of its successor, the Hybrid Music 5000, at the 4th Official Acorn User Show. Continuing development has created an integrated music production package of unparalleled power, versatility and ease-of-use, now fully able to accommodate important hardware and software expansions.

Music 500 owners are far from forgotten - a software & documentation 500-to-5000 upgrade pack has been created for them, and full details of this and the complete Music 5000 package will be available at the Show, including specifications, prices and ordering details. Also available will be the new Music 5000 Audio Demonstration Cassette.

Though no further information can be released before the first day of the Show, don't worry if you can't attend - we will send you an information pack as soon as possible afterwards.

Come and experience the future of microcomputer music at Stand 9 at the Acorn User Show, 24th to 27th July 1986.

4th
OFFICIAL
ACORN USER
